

# HOW FASTER DEPLOYMENT OF TRANSFORMATIVE CAPABILITIES ARE CHANGING THE GAME IN DEFENSE

**Viasat has a track record of creating industry firsts** that transform missions and make new kinds of operations possible. We blend breakthrough commercial and defense technologies with unconventional ingenuity to rapidly deliver greater operational capabilities for the U.S. and International defense community.

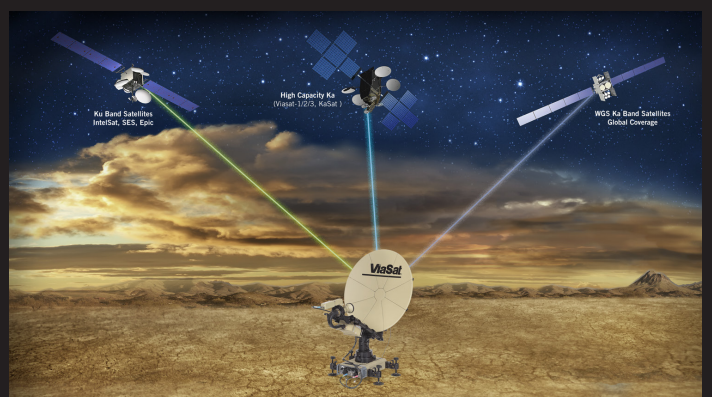

## SENIOR LEADER COMMUNICATIONS: 12 MONTHS TO IOC

### 100X SATCOM CAPACITY AT 1/10 THE COST THAN PREVIOUS CAPABILITY

Roaming over 35 satellites and 4 networks, Viasat's in-flight broadband and communications services deliver a global, "office in the sky" experience for senior leaders and their staff.

## MULTI-MISSION SATCOM: 8 MONTHS TO IOC

### SEAMLESSLY ADAPTS AS YOUR MISSION AND NETWORK CHANGES

Ease of set up designed to reduce on-the-job training hours. Allows for seamless cross-training for non-communication operators.

## DELIVERING INDUSTRY INNOVATIONS AND INDUSTRY FIRSTS TO DEFENSE

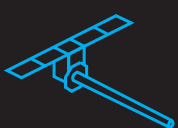

### Hybrid Adaptive Network

Pioneered the development of a new concept for defense communications by seamlessly integrating commercial satellite communications services with government satellites to create a network of networks.

### Highest-Capacity Satellites

Viasat is the leading innovator behind the world's highest capacity satellites. We're now accelerating the worldwide deployment of high speed broadband services for government and defense agencies with the ViaSat-3 class of satellites.

### World's First Link 16-Capable LEO Spacecraft

First company to prototype and test space-based Link 16 capabilities with fielded U.S. Air Force, Army, Navy, Marine Corps, and Special Operations Link 16-enabled platforms

### World's First and Only Handheld Link 16 Radio

Revolutionized Close Air Support missions by reducing the time for completing a call for fires by 94% (an average of 9 min down to 30 seconds).

### Cyber Security Operations Center

Analyzing over 2.4 billion events across our network every single day, we have insights into some of the most sophisticated cyber threats in the world.

### World's First and Only 100 GB Encryption Product

Offering the same encryption power of 10 separate 10 Gbps encryptors, we've combined both security and high-speed processing power in a single unit
